

Smokey Butte Red Angus

2026

Private Treaty Sale

Opens April 4th 1:00PM MST

631 Smokey Butte Road Jordan, MT

Welcome to our 2026 Private Treaty Sale!

2025 was a great year for Smokey Butte Red Angus and we are excited to see what 2026 has in store. This year we are offering 35 Red Angus bulls bred for powerful performance and ranch practicality. Located 6 miles west of Jordan, Montana, our cattle must withstand the harsh conditions while still producing a quality calf. From winter storms with temperatures plummeting below zero to the droughty summers where the days exceed 100°F our cattle hold up.

The spring of 2025 started off dry; however, July brought an onslaught of much needed rain. Our pastures recovered enough to produce some quality fall grazing, allowing us to wean these bulls without the use of creep feed. All the bulls received 3 rounds of vaccinations, first at branding, then pre-conditioning, and a third round at post- weaning.

We strongly believe in the power of Red Angus cattle. The commercial side of our operation has continued to profit year after year. When managing our registered herd, we always have the interest of the commercial cow/calf operator in mind. We selected sires that would bring performance genetics to meet with the proven maternal strength and longevity of our cow herd, resulting in calves that deliver soundness, pounds, and profit.

Alongside the business of the ranch, we have also been incredibly busy raising our two little girls, Hensley (3) and Stevie (18 mo). This past year we moved into the ranch house, celebrated Aunt Tristan and Uncle Andrew's wedding, took a fun-filled trip to Pennsylvania and Virginia to see family, went on Hensley's first horseback rides, and had a wonderfully quiet fall.

We extend our greatest appreciation to our past customers and look forward to meeting with all who are interested in our 2026 bull crop.

Thank you for your consideration,

Kane & Molly MacDonald

Sale Information

DIRECTIONS:

Located at 631 Smokey Butte Road, Jordan, MT.
From Highway 200 in Jordan, turn west on the Brusett Road and follow for 6 miles. At the end of the pavement turn left onto Smokey Butte Rd, follow to ranch. From 200W turn left after mile marker 205, about 6 miles before Jordan, follow road past Smokey Butte to the house.

BREEDING SOUNDNESS:

Breeding soundness exams are done in March. Any bull listed in this catalog that does not pass a fertility exam will be stricken from the sale.

SEMEN INTEREST:

50% semen interest will be retained in all bulls.

GUARANTEE:

All bulls are guaranteed to pass a fertility and health exam. Should a bull be injured after purchase and prior to delivery, a bull of equal quality will be provided as agreed upon by the buyer, or a full refund.

TERMS & CONDITIONS:

Bulls are available to view by appointment after March 1st. We would like to give all of our customers an equal opportunity to purchase bulls, therefore during the open house on April 4th we will be accepting written bids silent auction style. Each bull will have a base price and bids can be placed in \$250 increments from 1PM to 3PM. Buyers can place bids via call or text to Kane or Molly if they are unable to attend the open house in person. At the conclusion of the open house the remaining bulls will be available for private treaty sale at the base price. Full payment is required at the time of commitment.

LUNCH:

Lunch and refreshments will be provided at noon.

SUPPLEMENT SHEET:

Supplement sheet will be available at the open house, on our website, or by request.

INSURANCE:

Buyers assume risk of bull upon purchase and are encouraged to purchase insurance.

DELIVERY:

We offer free delivery of bulls within 500 miles of Jordan, MT. A \$200 discount will be applied to all purchases for bulls hauled on day of sale.

SALE CONTACTS:

Kane MacDonald: 406-853-2049
Molly MacDonald: 814-657-8553

RED ANGUS GUIDE TO EPDS

RedAngus.org

ProS – Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include CED, ADG, HPG, STAY, MW, DMI, CW, MARB, REA and Fat. **Index | Dollars per Head | Higher Value**

HB – HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. This index is a combination of CED, CEM, WW, Milk, MW, HPG and STAY. **Index | Dollars per Head | Higher Value**

GM – GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feed yard performance and carcass traits. GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. This index is a combination of ADG, CW, DMI, MARB, Fat and REA. **Index | Dollars per Head | Higher Value**

CED – Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. **Percent | Higher Value**

BW – Birth Weight predicts differences in actual birth weight of progeny. **Pounds | Lower Value**

WW – Weaning Weight predicts differences in 205-day weaning weight. **Pounds | Higher Value**

YW – Yearling Weight predicts differences in 365-day yearling weight. **Pounds | Higher Value**

ADG – Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. **Pounds | Higher Value**

DMI – Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. **Pounds | Lower Value**

MILK – Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. **Pounds | Higher Value**

ME – Maintenance Energy predicts the difference in maintenance energy requirements. **Mcals per Month | Lower Value**

HPG – Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. **Percent | Higher Value**

CEM – Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. **Percent | Higher Value**

STAY – Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. **Percent | Higher Value**

MARB – Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. **Marbling Score Units | Higher Value**

YG – Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. **Yield Grade Units | Lower Value**

CW – Carcass Weight predicts differences in actual hot carcass weight. **Pounds | Higher Value**

REA – Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. **Square Inches | Higher Value**

FAT – Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. **Inches | Lower Value**
